Description

User Agent: Mozilla/5.0 (Windows NT 10.0; Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko) Chrome/63.0.3239.132 Safari/537.36

Steps to reproduce:

I tried to download a file.

Actual results:

It takes its own destination without my approval or user acknowledgement

Expected results:

It should pop-up a window asking for a destination to place the file on the specific location.
